

SuperHoist™

Coleman SuperHoist is an economical pneumatic lift utilizing infinitely controllable raise and lower speeds with its ergonomically designed trigger control. “Crane” type circuitry holds the load in place with a narrow-window “balance” helpful for precise load placement applications. SuperHoist can support a variety of gripping attachments.

For Performance and Quality

- Coleman Pistol Grip Control mounted on a pivot to follow the operator’s wrist movements as the SuperHoist moves up and down
- Push button throttle valves allow infinitely variable speed
- All pneumatic
- Safety system controls the load in the case of a lost air supply
- Standard 48” lift
- Rod eye allows easy connection to overhead trolley
- Swivel hook mounted on lower clevis
- Heavy duty construction yields a long maintenance free life
- 100% Duty Care
- Exclusive Coleman Speed Valve limits upward speed to approximately 1ft/sec.

Specifications for Standard Models

Model	* Collapsed Length	* Extended Length	Weight	* Capacity @ 85 psi	* Capacity @ 100 psi
SH200	63"	111"	28 lbs.	200	240
SH400	63"	111"	30 lbs.	340	400
SH600	64"	112"	45 lbs.	570	675
SH1000	65"	113"	53 lbs.	910	1075

* Approximate lengths in inches and capacities in pounds. Different lift lengths and larger capacities are available.
